

EyeQue®

Insight+

Test Your Vision, Test Your Glasses.

Know if it's time to get new glasses or contacts without leaving your home.

Insanely easy to use and incredibly accurate, the EyeQue Insight Plus™ saves time, saves money, and puts you in control of tracking vision changes for you and your loved ones.

- **Fast & Convenient** – Test if you're seeing 20/20 - 20/400 in about a minute at home or on the go. Wear your current glasses or contacts to determine if an updated prescription is needed.
- **Safe & Secure** – Insight uses filtered light from your smartphone screen. Instantly record, securely store, and share results from your online dashboard.
- **Accurate** – Patented goggle design consistently mimics the required 20 feet (6 meter) distance while the app randomizes test patterns to ensure accuracy.
- **Affordable** – One Insight and the free mobile app can be used by many people, making it a value for the family and suitable for group screenings.
- **Scalable** – Software and application updates add more functionality over time. Three tests in one device and more on the way!

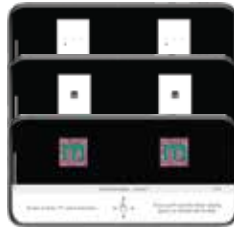

5 Ways to Get to Know Your Eyes with the EyeQue Insight Plus

- 1 Test Your Distance Vision**
Know if you're seeing 20/20 in about a minute with and without your glasses or contacts.

- 2 Check Your Prescription**
If you aren't seeing 20/20 with your glasses or contacts on, it's time to update your Rx with a doctor's visit or use the EyeQue VisionCheck® to get new EyeGlass Numbers®.

- 3 Test Your Contrast Sensitivity**
Having trouble driving at night? Test your contrast sensitivity which can indicate conditions like glaucoma and cataracts.

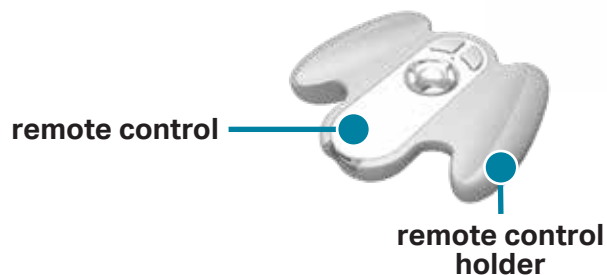

- 4 Test for Color Deficiency**
Discover if you are color blind and specifically, what color deficiency level and type you have: tritanopia, deuteranopia, or protanopia.

- 5 Monitor Your Vision Changes Over Time**
Store test results instantly and securely in the EyeQue Cloud®. Access them anytime from your smartphone or your online dashboard.

Flexible Testing Options with the Insight Plus Accessory Kit

The Insight Plus includes each of these accessories to make testing fun and fast. An adjustable head mount secures your smartphone to the Insight goggles and the goggles to your head, leaving your hands free to focus on taking the test. Use the sleek Bluetooth-enabled handheld remote control alone or place it in a game-like controller holder – great for children's smaller or adult's larger hands, or those with low dexterity.

Download the free EyeQue Insight app from Apple's App Store or Google Play.
