

# EyeQue PDCheck™

## Capture Your Pupillary Distance Instantly

Get that elusive little number  
needed to order your glasses.

EyeQue PDCheck™ is the fastest way to accurately capture your pupillary distance (PD), the two digit number required to order glasses, yet often missing from your written prescription.

An accurate measurement of pupillary distance (PD) is critical to getting a comfortable, effective set of eyeglasses. If the measured PD is wrong, your glasses will be uncomfortable, make you feel dizzy or give you headaches. Enter PDCheck:

- **Accurate** – The PDCheck Frames are etched with a patented set of T-marks to provide an accurate reference point. The PDCheck app uses image processing to detect the T-marks and your pupils, determining the distance between the center of your eyes to an accuracy of +/-1mm.

- **Fast & Convenient** – No need to print out a paper ruler or hold a credit card against your forehead. Snap a selfie or have a friend take your photo while wearing the PDCheck Frames and your PD is automatically extracted and stored in the mobile app.
- **Secure** – Your PD is stored, but your selfie is not. The relevant parameters are computed and securely stored in the EyeQue Cloud® for you to view anytime, in the app or online in your personal EyeQue dashboard.

# 3 Simple Steps to Get Your PD with the EyeQue PDCheck

- 1 Get Ready. Get Set...**  
Put on your PDCheck Frames and launch the EyeQue PDCheck app.
- 2 Go! Snap a photo.**  
From the application, take a selfie or have a friend take your photo. The camera works in either direction.
- 3 Customize Your Results.**  
Adjust the markers to the center of your pupils and "T" marks (if needed) to get the most accurate PD.

## Here's What You'll Need to Get Started

### PDCheck Frames

One size fits all. The PDCheck Frames are universal and flexible.

### Mobile Application

Download the free EyeQue PDCheck app from Apple's App Store or Google Play.

### EyeQue Membership

A free basic membership is all you need to set up your personal account. Upgrade your membership any time to use other EyeQue at-home vision solutions like the EyeQue VisionCheck™.

### Smartphone & Internet Access

Thousands of models supported around the world: any Android 5.0+ or iOS 10 smartphone.

## Want More At-Home Vision Convenience?

PDCheck is included with a purchase of the award-winning EyeQue VisionCheck™ refractive error test – the fastest, easiest way to test your vision and generate EyeGlass Numbers® used to order new glasses online. Visit [eyeque.com/visioncheck](http://eyeque.com/visioncheck) for more information.
