

EyeQue®

Vision Monitoring Kit

**Test Vision.
Get New Glasses. Repeat.**
Award-winning products in one convenient kit.

All of our award-winning smartphone vision tests assembled in a convenient travel case. Test and track multiple aspects of your vision, anytime you want and share the devices with your loved ones.

- Screen for visual acuity, contrast sensitivity, and color deficiency in minutes.
- Check whether your glasses or contacts are correcting your vision to 20/20.
- Get updated glasses using your EyeGlass Numbers® – sphere, cylinder, and axis measurements.
- Measure your pupillary distance (PD) to 1mm accuracy for the best fitting glasses.
- Share the vision test devices with your loved ones and securely store each person's vision results in personal accounts.*

Test Your Vision. Test Your Glasses. Get New Glasses. Repeat.

Each smartphone vision test plays a role in your personal vision care plan.

1

Use **EyeQue Insight®** to know if you're seeing 20/20 in about a minute. Test with and without your glasses or contacts.

Designed for ages six and up, Insight screens for visual acuity, color deficiency, contrast sensitivity, with each test taking about a minute.

2

Use **EyeQue VisionCheck®** to measure your refractive error - the lens power needed to correct nearsightedness, farsightedness, and astigmatism.

Ideal for adults, measures for refractive error of each eye and delivers standard optometric sphere, cylinder, and axis figures in the form of EyeGlass Numbers.

3

Use **EyeQue PDCheck®** to capture your pupillary distance, a critical measurement for getting a proper fitting pair of eyeglasses.

Instantly measures the distance between the centers of the pupils, as simple as taking a selfie; more accurate than other methods.

4

Use your **EyeGlass Numbers** to order new glasses online. Use the Insight again to test the performance of your new glasses.

New!  Get **EyeQue Try-On Glasses™** – low-cost glasses to verify your EyeGlass Numbers. Then, confidently order new glasses from online retailers.
